SUMMARY

Full-stack software engineer with 20+ months of production experience building enterprise-grade financial systems (.NET Core, Angular, Python, SQL) for regulated banking clients across India, Bhutan, and Sri Lanka. Independently owned and delivered 3 complex products end-to-end. Designed configurable workflow engines, no-code reporting platforms, and event-driven systems following SOLID principles and clean architecture. Actively builds LLM-powered applications using LangChain, LangGraph, and RAG — passionate about AI and scalable platform engineering.

EXPERIENCE

Software Engineer

May 2025 – Present

CareEdge Analytics & Advisory · Mumbai

- Owned and delivered 3 enterprise banking products end-to-end (Stress Testing, Operational Risk, Loan Origination) across clients in India, Bhutan, and Sri Lanka — from requirements and data modelling to production deployment.
- Engineered a no-code Report Builder & Dashboard Builder: visual table-join UI (JOIN, GROUP BY, ORDER BY, aggregates) generates parameterised SQL at runtime with SSR output — significantly reduced ad-hoc reporting Change Requests for client teams.
- Designed an Authorization Policy Engine: configurable N-level review chains with screen-level access control, decoupling permission logic from application code entirely using SOLID principles.
- Engineered Python ETL pipelines (APScheduler + pandas) for 2 banks: extraction, transformation, and PostgreSQL load — enabling automated regulatory report generation without manual data prep.
- Resolved critical Angular performance bottleneck: lazy-loaded modules, eliminated redundant API calls, enabled SSR — 20% load time improvement.
- Awards: Hats Off FY25 Q4 · Emerging Engineer of the Year FY26 · Rookie of the Year FY26

Software Development Intern

Nov 2024 – Apr 2025

CareEdge Analytics & Advisory · Mumbai

- Delivered production features across 3 banking modules using .NET Core Web API, Angular, Oracle SQL, and PostgreSQL; applied TDD with xUnit for financial data aggregation logic.
- Refactored internal Angular component library — extracted shared controls and data-grid wrappers, reducing per-module boilerplate by ~30%.

AI & Web Development Intern

Jan 2022 – Dec 2022

EddyTools Tech. Solutions · Remote

- Built 6 real-time computer vision pipelines (drowsiness detection, smart attendance, speed estimation) using Python, OpenCV, and Flask with CI/CD deployment.
- Shipped 3 client web projects using Node.js and Next.js with basic CI deployment workflows.

PROJECTS

DocuMind — RAG Document Intelligence

Python · .NET Core · LangChain · LangGraph · AES-256

- Multi-format document Q&A (PDF, DOCX, PPTX, XLSX): window chunking, embeddings, LangGraph multi-hop reasoning agent. Microservices-style backend with AES-256 file encryption.

Cultivate 365 — AI Precision Agriculture

Python · XGBoost · TensorFlow · ResNet9 · Flask · Gemini AI

- Benchmarked 5 ML classifiers for crop recommendation (XGBoost: 98.6% accuracy), ResNet9 CNN for leaf disease detection. Published at National Conference on Industry 4.0 (2024).

[KarmaKendra](#) — Task & Study Manager

Angular · TypeScript · IndexedDB · Google Sheets API v4

- Offline-first Kanban PWA: IndexedDB persistence, Angular CDK drag-and-drop, Pomodoro timer, bidirectional Google Sheets sync. Modular SOLID architecture.

TECHNICAL SKILLS

- **Backend:** C#, .NET Core 8, Python, FastAPI
- **Frontend:** Angular 18, TypeScript, HTML5, Tailwind CSS
- **AI / ML:** LangChain, LangGraph, RAG, PyTorch, Scikit-learn, TensorFlow, Pandas
- **Databases:** Oracle SQL, PostgreSQL, ElasticSearch, MongoDB
- **Cloud & DevOps:** Azure & AWS, Docker, Git, GitHub Actions, CI/CD

EDUCATION

B.E. Computer Science (AI & ML)

2020 – 2024

Saraswati College of Engineering, University of Mumbai with **CGPA 8.29**

CERTIFICATIONS & RESEARCH

- ASP.NET Core 10 — Udemy, 2026
- Prompt Engineering — DeepLearning.AI, 2025
- LangGraph — LangChain Academy, 2025
- Core Technical: DSA, DBMS, Java — Scaler, 2024

Published: Cultivate: ML-based Precision Agriculture — National Conference on Industry 4.0, Vishwaniketan iMEET (2024)

LEADERSHIP

Vice President, Rotaract Club of Saraswati College

Jun 2023 – Jun 2024

- Led 92+ community projects; nominated Best VP at District level; club achieved highest Diamond ranking.
